

Convert your Design Ideas into Prototypes and Functional Units

3D PRINTING

Affordable and satisfactory 3d printing services starting from design to final implementation or printing-only solutions as per the customer design.

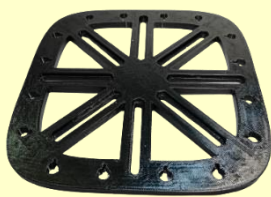

- Design Support
- Customization
- Affordable Cost
- Variety of Materials and Colours
- High Resolution

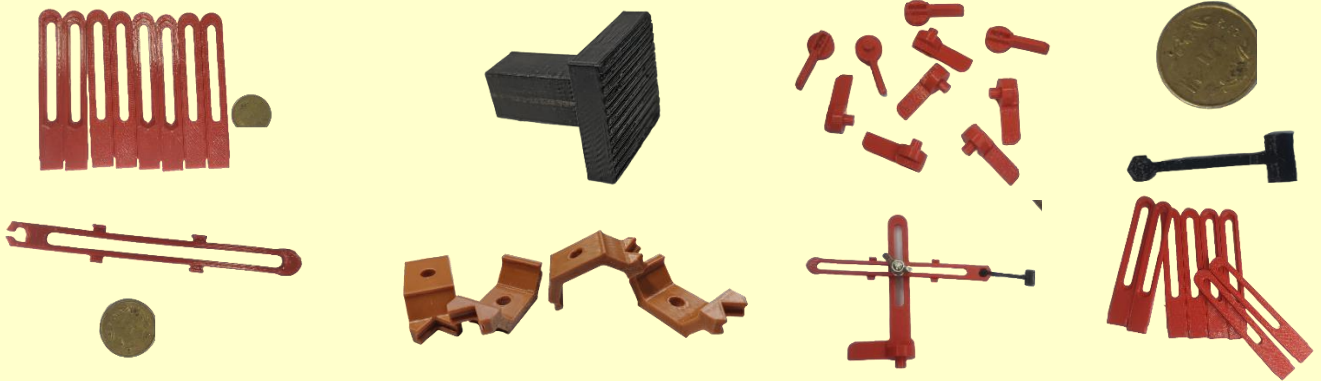

Boxes and Enclosures

Customized Designs

Precision Components

Toys and Fun

Material Options

PLA/ PLA+ (Polylactic acid)

Rigid, strong, but slightly brittle
 Less resistant to heat and chemicals
 Good surface quality with Glossy finish, vibrant colours
 Low warping & shrinkage
 Wide range of vibrant colours
 Consistent accuracy and stability
 BPA-free and styrene-free, Biodegradable, Non-Toxic, Odorless

Concept models
 Look alike prototypes
 Components/ parts
 Indoor/ laboratory use

PETG (Polyethylene Terephthalate Glycol)

Strong and durable, Chemical and Weather resistant
 Flexible and bendable,
 Low warping and shrinkage
 Great layer adhesion
 High strength, temp. resistance, good hardness, Low odour

Watertight applications
 Snap-fit components

ABS/ ASA (Acrylonitrile Butadiene Styrene)

Cost efficient
 Tough and durable, Heat, Impact, UV resistant
 Smooth finish with versatile post processing capability

Functional prototypes
 Outdoor applications
 Automotive parts
